PG01 · WEEK 3 · SESSION 3 · PART 2

Could Your Reader Find It?

Citations and reference lists that a marker can check line by line

TODAY'S QUESTION

One question for the next 110 minutes

If your marker checked every citation in your report, would each one lead to the right source?

Place citations exactly where borrowed ideas start and stop, including secondary sources.

Build APA 7 reference entries from the source itself, using the 4W check.

Find and fix errors in app-generated and model reference lists.

WARM-UP · INDIVIDUAL · 3 MIN

Recall from Week 2: five quick questions

1. A source has three authors: Smith, Black and Jones (2010). Write the in-text citation.
2. Inside brackets, do two authors take "and" or "&"?
3. A BBC article shows no author. Who goes in the citation?
4. A reliable web page shows no year. What do you write instead?
5. When must a citation include a page number?

Class page > Session 2 > Task 2.1 (instant feedback)

HOOK · PAIRS · 6 MIN

Be the marker: can you reach these sources?

Reference list

Wrong joiner

FINDABLE, BUT MARKED DOWN

"Smith, et al." and "Young, K. and Black, J." APA: Smith et al. / Young, K., & Black, J.

Title case

FINDABLE, BUT MARKED DOWN

"Homesickness Explained" > Homesickness explained

KEY IDEA

Your reasons already have names

"The name didn't match"

WHO

"Which year? Which article?"

WHEN

"The title looks wrong"

WHAT

"The link is dead"

WHERE

APA builds every reference from the same four questions: who made it, when, what it is called, and where to find it.

THE FRAMEWORK

The 4W reference check

WHO
Author

Surname, Initials. All authors (up to 20). Or the organisation.

Mulrooney, H.

WHEN
Date

(Year). News/web: (Year, Month Day). Same author + year: 2011a, 2011b.

(2019).

WHAT
Title

Sentence case. Italics for books and stand-alone web pages; plain for articles.

Public health approaches to tackling obesity in the UK.

WHERE
Source

Journal + volume(issue), pages + DOI. Or publisher. Or site name + URL.

Practice Nursing, 30(6), 294–298. https://doi.org/...

The match rule: every in-text citation has one entry, and every entry has at least one citation. Same spelling, same year, same letter.

PLACEMENT CHECK · PAIRS · 6 MIN

Correct or not? If not, fix it

1	According to (Fredston, 1999), although there may be some simple initial difficulties, these are considered small challenges.	YES	NO
2	Young and Black (2009) observe that "foreigners are eager to mingle with the locals and try new foods" (p. 5).	YES	NO
3	Davies (2008) These difficulties with the language and customs mean that any initial positive feelings may start to disappear.	YES	NO
4	... during which the sufferer experiences some highs and some lows. This report will briefly explain the different stages of Culture Shock (Smith et al., 2010).	YES	NO
5	After about three months, differences in behaviour become more noticeable. Fredston 1999. 80% of international students claim to feel depressed around 10 weeks into their courses.	YES	NO

ANSWER KEY · PLACEMENT

The citation sits next to what it supports

1	NO	Brackets wrong. According to Fredston (1999), although ...
2	YES	Reporting verb + quotation marks + page number after the quote.
3	NO	No reporting verb. Davies (2008) explains that these difficulties ...
4	NO	The citation is on the writer's own sentence. Move it: ... some highs and some lows (Smith et al., 2010). This report will ...
5	NO	No brackets, and the statistic has no source. ... more noticeable (Fredston, 1999). [Source needed for the 80% claim.]

Mulrooney cites Butland. Who do you cite?

Public health approaches to tackling obesity in the UK

Being obese and overweight affects an increasing number of adults and children in the UK. **Hilda Mulrooney** presents an overview of the population-based approaches to improving public health and enabling more people to lose weight

ABSTRACT

Obesity is a serious condition that is highly prevalent in UK adults and children. A number of population-based approaches to improve the 'obesogenic' environment have been put into place while more are being proposed. Many of these approaches have the advantage of potentially altering dietary intakes without individual behaviour change, and they are taking place in a wider context that encourages physical activity and partnership working. Approaches to obesity and progress made towards targets will be discussed.

Key words | Obesity | Public health | Population | Environment | Prevention

Public health and population-based approaches to tackle obesity such as better labelling on foods and restricting advertising of high fat, salt and sugar (HFSS) products, are gaining traction in the UK. With an estimated 57% of women and 66% of men affected by overweight or obesity, specific ethnic groups, prevention measures could also be considered a matter of improving health inequalities (NHS Digital, 2018a).

The issues at hand

People gain weight when their energy intake exceeds energy expenditure, when more calories are consumed through food and drink than expended through activity. Although this appears simple, it only describes the mechanism by which weight is gained and not the reasons behind why it is gained. Energy balance is complex and it is well recognised that a multitude of interconnecting factors affect it, many of which are outside of conscious control (Butland et al, 2007).

Humans are genetically susceptible to gaining weight and many of us live in environments that allow, and even encourage, this to happen. For that reason, focusing on individuals and their behaviour is a limited response. There is no doubt that personal behaviours around food and activity influence body weight, but years of weight management research is clear: losing weight is a lot easier

Mulrooney (2019), page 1. Note "(Butland et al, 2007)" in the right column.

1

Best

Find and read Butland et al. (2007) yourself. Then cite it directly.

2

If you cannot

In the text: (Butland et al., 2007, as cited in Mulrooney, 2019)

3

Reference list

Only the source you read: Mulrooney (2019).

COMMON TRAPS

Four beliefs that cost referencing marks

"Use et al. on the reference list too."

REALITY

et al. is for the text only. The list names every author, up to 20, with a comma before "&".

"I chose APA in the app, so it's right."

REALITY

Database and app output often breaks APA rules. Check every entry with the 4W check.

"One citation at the end covers the paragraph."

REALITY

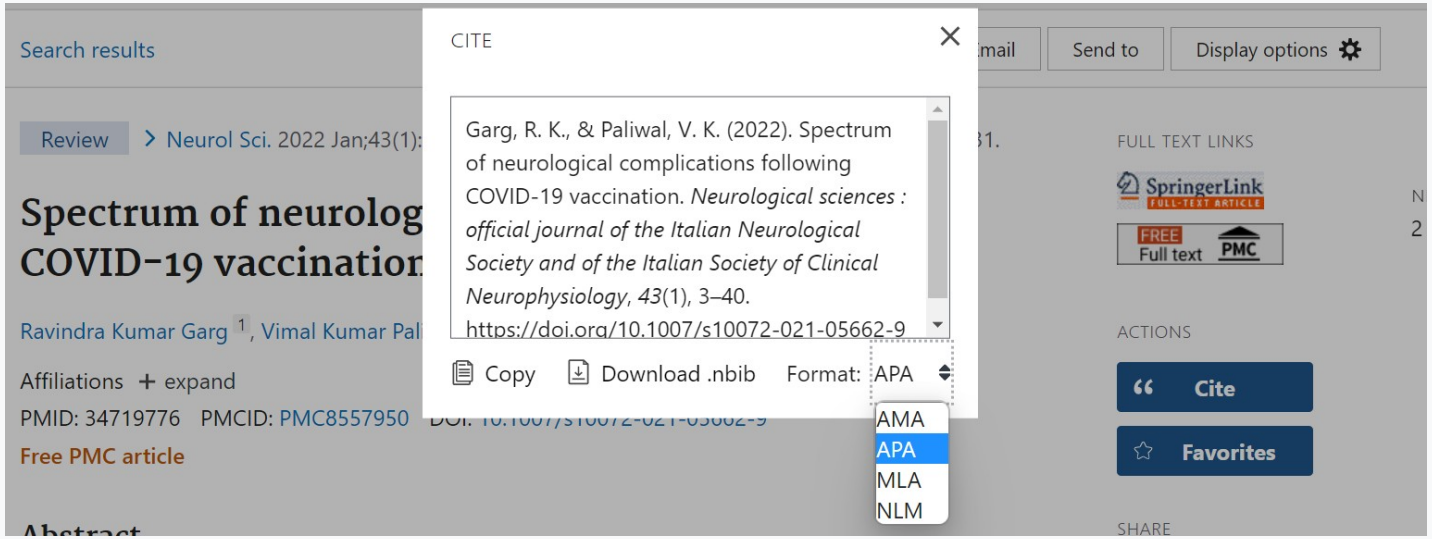

Only if everything before it comes from that one source and none of it is your own comment.

"I can list the source my source cited."

REALITY

List only what you read. Use "as cited in" for the original.

PubMed says "APA". Is it?

WHAT THE "APA" BUTTON GAVE

Neurological sciences : official journal of the Italian Neurological Society and of the Italian Society of Clinical Neurophysiology, 43(1), 3–40.

APA 7, CHECKED WITH 4W

Garg, R. K., & Paliwal, V. K. (2022). Spectrum of neurological complications following COVID-19 vaccination. *Neurological Sciences, 43*(1), 3–40. https://doi.org/10.1007/s10072-021-05662-9

WHERE was wrong: the journal's name is Neurological Sciences. The subtitle is not part of it.

Building a reference from the source itself

Hilda Mulrooney Senior Lecturer in Nutrition, School of Life Sciences, Chemistry and Pharmacy, Kingston University, London; Obesity Group of the British Dietetic Association

Email: hilda.mulrooney@kingston.ac.uk

Children and adults in the UK consume too many calories, too much sugar, and less fruit, vegetables and fibre than recommended (PHE, 2015a; 2018c; 2018d). Soft drinks are a major contributor to both children and adults' sugar intake. Sugar intakes in school-aged children and teenagers are three times higher than recommended, while intakes in adults are double recommended levels (PHE, 2015a).

Reference list checklist for Assessment 1 (Referencing: "Error-free APA" = 91-100%)

YOU DO · INDIVIDUAL · 20 MIN

ON YOUR OWN

Start your Assessment 1 source log

Three sources

On your sustainability topic. At least one journal article. Each passed your credibility check.

Three references

APA 7, built from the source itself. Run the 4W check on each.

Three sentences

One sentence using each source, with the citation in the right place.

Match rule

Every citation has its entry. Same spelling, same year.

Class page > Task 2.6, then "Copy my work" and paste it into the Moodle forum. Keep the log: you will use it in Assessment 1.

EXIT TICKET · 3 MIN

Before you go

1. You read Mulrooney (2019), who cites Butland et al. (2007). Write the in-text citation.

2. Which 4W element is missing? "Garg, R. K., & Paliwal, V. K. Spectrum of neurological complications ... Neurological Sciences, 43(1), 3–40."

3. Your text says (Tropical Medicine Bureau, 2016). Your list says Tropical Medical Bureau. Which rule is broken?

→ **Next: Week 4, Session 1.** What is the question really asking? The Assessment 1 brief is released.

Practice questions: answers

1	B	Patchwriting: only Synonyms used
2	C	Active/passive + Statistics
3	A	Synthesis: several sources, one paragraph, who said what
4	D	Not necessarily: Turnitin matches wording only
5	B	"Around 206,000 new jobs were created ..."
6	C	To analyse an exact definition
7	A	Block quote: indented, no quotation marks
8	D	(Butland et al., 2007, as cited in Mulrooney, 2019)
9	A	WHO: the names do not match
10	C	Walden University (2024) warns ... which suggests ...
