PG01 · WEEK 3 · SESSION 3 · PART 1

Whose Words Are These?

Quoting, paraphrasing, summarising and synthesising without plagiarising

TODAY'S QUESTION

One question for the next 110 minutes

How do you use another writer's ideas without stealing their words or changing their meaning?

Decide when to quote, paraphrase or summarise a source, and justify the choice.

Paraphrase a paragraph with the SWAPS levers, keeping the meaning exact and adding a citation.

Synthesise two sources into one cited paragraph that shows who said what.

WARM-UP · PAIRS · 5 MIN

Rank these four versions

ORIGINAL (BBC, 2021): The BRT uses triple section bendy buses and it is cheaper to run than a tube system. It carries 2 million passengers a day; 80% of travellers use the BRT.

A The BRT uses triple section bendy buses and it is cheaper to run than a tube system. It carries 2 million passengers a day; 80% of travellers use the BRT (BBC, 2021).

B The BRT uses triple-section articulated buses and is less expensive to run than a metro system. It transports 2 million passengers daily; 80% of commuters use the BRT.

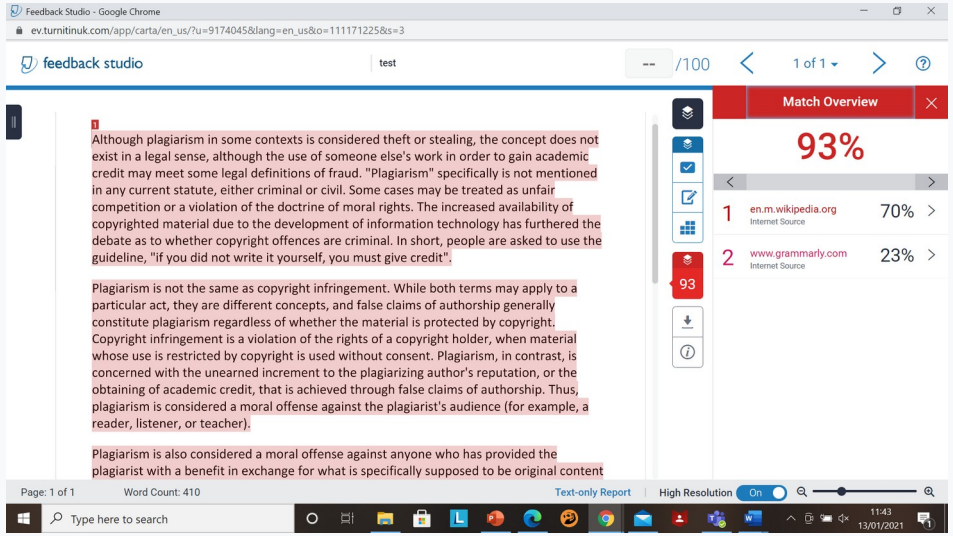

C Curitiba's bus network, which is cheaper to operate than an underground railway, is used by 8 out of 10 people and moves 2 million passengers every day (BBC, 2021).

D Curitiba's BRT runs on three-section articulated buses, which cost less to operate than an underground railway. The system moves two million passengers daily, and four out of five travellers in the city use it (BBC, 2021).

Rank them from most to least acceptable in an academic report. Write one reason for each. Class page: Task 1.1

THE REVEAL

Turnitin sees copying. Your marker sees meaning.

93%

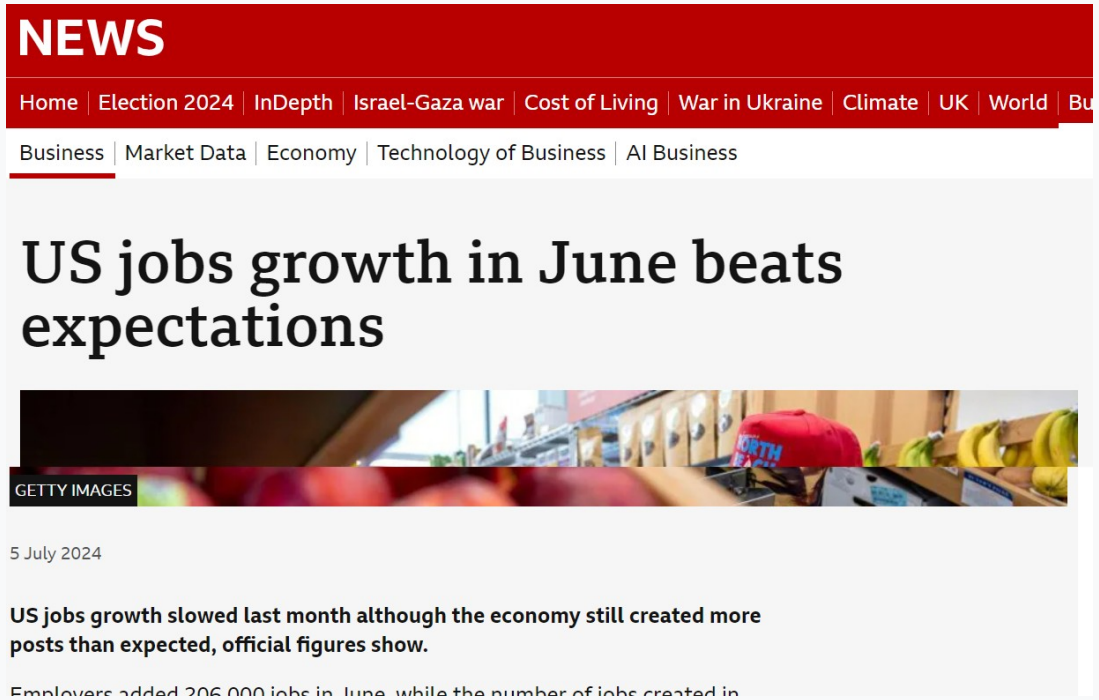

A real Turnitin report on a student text about plagiarism: 70% copied from Wikipedia, 23% from Grammarly.

The similarity score is not a grade. Always open the highlighted parts.

	TURNITIN	MARKER	
A	HIGH MATCH	PLAGIARISM	Exact wording with no quotation marks. A citation does not fix copied wording.
B	PARTIAL MATCH	PLAGIARISM	Words swapped, structure kept, no citation.
C	LOW MATCH	MISREPRESENTS	80% of travellers is not "8 out of 10 people".
D	LOW MATCH	ACCEPTABLE	New structure, same meaning, cited.

REAL CASE · 1 MIN SILENT, THEN PAIRS

Spot the drift

US jobs growth in June beats expectations

GETTY IMAGES

5 July 2024

US jobs growth slowed last month although the economy still created more posts than expected, official figures show.

Employers added 206,000 jobs in June, while the number of jobs created in

Lede in the screenshot: "Employers added 206,000 jobs in June ..." BBC News, 5 July 2024.

PARAPHRASE ON LAST YEAR'S SLIDE

"Employers advertised over 205,000 jobs in June, adding to the 218,000 posts created in May. Unemployment in the US increased to just over 4% ... (BBC, 2024)."

Find the word that changes the meaning.

Would Turnitin notice? Why not?

KEY IDEA

Your reasons already have names

"They copied it"

Plagiarism

Using another writer's words or ideas without acknowledging them in an accepted way (Bailey, 2006). Includes reusing your own earlier work.

"They just swapped words"

Patchwriting

Synonyms dropped into the original sentence structure. It still counts as plagiarism.

"They changed the facts"

Misrepresentation

A cited paraphrase that says something the source did not say.

"Someone else wrote it"

Collusion

Using another student's work, an essay mill or AI-written text as your own.

All four are academic offences. Work can be penalised or failed, and suspected cases are investigated.

THREE WAYS IN

Quote, paraphrase or summarise?

Quote

Exact words, used sparingly

- An exact definition
- Wording that is memorable or very concise
- You respond to the exact words

Under 40 words: "double quotation marks" + page, e.g. (Ervin et al., 2018, p. 470)

Paraphrase

Your normal choice

- Same ideas, same detail
- Your words AND your structure
- Roughly the same length

Always cited. Page number recommended but optional.

Summarise

Main points only

- Shorter than the original
- Selected key points
- Also in your own words

Always cited. A summary is a shortened paraphrase.

40 WORDS OR MORE: BLOCK QUOTE

Researchers have studied how people talk to themselves:

> Inner speech is a paradoxical phenomenon. It is an experience that is central to many people's everyday lives, and yet it presents considerable challenges to any effort to study it scientifically. Nevertheless, a wide range of methodologies and approaches have combined to shed light on the subjective experience of inner speech and its cognitive and neural underpinnings. (Alderson-Day & Fernyhough, 2015, p. 957)

- New line
- Whole block indented 0.5 in
- No quotation marks
- Citation after the final full stop

Example: APA (2024)

THE FRAMEWORK

SWAPS: five levers for a real paraphrase

S	W	A	P	S
Synonyms	**Word form**	**Active / passive**	**Position of ideas**	**Statistics & time**
cheaper > less expensive	employers subsidise > employers offer a subsidy	80% of travellers use the BRT > the BRT is used by 80% of travellers	Reorder clauses: start with the result, then the cause	80% > four out of five; a day > daily

Keep: names, titles, technical terms, citations, small common words (the, because, however) and numbers that must stay precise. **Use at least three levers, then run the 3-check: meaning kept? look changed? source cited?**

COMMON TRAPS

Four beliefs that cost students marks

"Synonyms are enough."

REALITY

Changing a few words keeps the original skeleton. That is patchwriting. Change structure too: use at least three levers.

"A paraphrase doesn't need a citation."

REALITY

The words are yours; the idea is not. Every paraphrase and summary needs a citation.

"Low Turnitin score = safe."

REALITY

Turnitin matches wording only. An uncited or inaccurate paraphrase can score 0% and still be plagiarism or misrepresentation.

"A paraphrasing tool or AI can do it."

REALITY

Tools produce patchwriting and meaning drift, and the text is not your own work. Paraphrasing yourself is how you understand the source and improve your English.

Paraphrasing two sentences, step by step

ORIGINAL (BBC, 2021): The bus fare is the same wherever you go, and some employers subsidise their employees who use it. Nobody lives more than 400 metres from a bus stop.

1 Find evidence

- Keep: BRT, 400 metres (precise), "some" employers
- Change: same fare wherever you go; subsidise; nobody ... more than

2 Judge

- W: subsidise > a subsidy
- P: put the 400 m fact first
- S: "nobody more than 400 m" > "every resident within 400 m"
- Check: "some" must stay "some"

3 Write it

Every resident of Curitiba lives within 400 metres of a BRT stop, and a ticket costs the same regardless of distance; in addition, some companies offer their staff a subsidy for using the system (BBC, 2021).

WE DO · GROUPS OF 3 · 15 MIN + 5 MIN PEER CHECK

YOUR TURN

Paraphrase the full Sustainable Transport paragraph

Writer: Drafts the paraphrase in the class page box.

SWAPS checker: Ticks each lever used. Pushes for at least three.

Meaning checker: Compares every verb and number with the original.

Class page > Session 1 > Task 1.4. Handout: Paraphrasing task (citation details at the bottom).

THEN SWAP WITH ANOTHER GROUP

- Does it make sense?
- Meaning kept?
- Look changed? (any copied strings?)
- Three or more SWAPS levers?
- Language errors that block meaning?
- Citation in a suitable place?

One possible version, with the levers labelled

Cities have several options when they plan to make their transport systems more sustainable, and the first is to discourage people from using private vehicles. Curitiba, in Brazil, offers an example with its Bus Rapid Transport (BRT) system. Its three-section articulated buses are less expensive to operate than an underground railway, and the network moves two million passengers daily, with four out of five travellers in the city using it. Passengers pay one fare regardless of distance, some companies give their staff a subsidy for using the service, and every resident lives within 400 metres of a stop. In London, a congestion charge has been introduced for vehicles that drive through certain zones (BBC, 2021).

- **S** — less expensive, articulated, staff, zones
- **W** — subsidise > a subsidy
- **A** — introduced a congestion charge > has been introduced
- **P** — 400 m fact moved; fare before employers
- **S** — 2 million a day > two million daily; 80% > four out of five

Last year's model: "8 out of 10 people", "0.5 kilometres". Both change the claim.

A summary is a paraphrase that selects

1. **Read until you understand**
2. **Note key points only**
3. **Hide the original**
4. **Write from your notes**
5. **Check meaning, then cite**

NOTES (British Safety Council, 2024)

- Any assessment: proportionate, relevant to the work
- Fire: required in all workplaces
- Manual handling: lifting, carrying, moving loads
- DSE: staff using computers, laptops
- COSHH: hazardous substances stored, used, made

SUMMARY · 64 WORDS

Any risk assessment must suit the work being carried out. Fire risk assessments are required in every workplace, while other assessments depend on the activity: manual handling assessments where staff lift, carry or move loads; display screen equipment (DSE) assessments where people use computers; and COSHH assessments where hazardous substances are stored, used or produced (British Safety Council, 2024).

SYNTHESISING

Three sources, one paragraph

Smith (2008) — FOR

Untested drugs have killed or seriously harmed humans, so animal testing saves human lives.

Brown (2012) — AGAINST

Animals feel pain in a way that is physiologically and neuroanatomically similar to humans.

Jones & Greene (2016) — AGAINST

Animals in distress can suffer psychologically, with symptoms of depression and anxiety.

Animal experimentation is a subject of heated debate. Some argue that it should be banned, as there is evidence that animals feel pain in a way physiologically similar to humans and can suffer psychologically **(Brown, 2012; Jones & Greene, 2016)**. **Others, however,** maintain that testing is necessary because untested drugs have killed or seriously harmed people **(Smith, 2008)**. This essay will present the main arguments for and against testing drugs on animals.

Semicolon citation: two sources make the same point

Linking phrase: turns a list into an argument

Your sentence: no citation on the writer's own framing

WE DO · GROUPS OF 3 · 25 MIN

YOUR TURN

Synthesise two texts: the disadvantages of AI in education

1 **Grid · 10 min**

List the themes as rows. Note each text's point in its column. A theme in both texts goes in one row.

2 **Order · 3 min**

Shared themes first, then single-source themes, then any counter-point.

3 **Write · 12 min**

About 200 words. Linking words. A citation for every borrowed point.

Credibility check (Week 3): Text 1 is a Forbes Councils post by a business owner; Text 2 is from Walden University, which sells degrees. Who has a vested interest?

Class page > Task 1.6. Handout: Summarising and Synthesising task + linking phrases.

Grid first, paragraph second

Theme	Text 1 (Shonubi)	Text 2 (Walden)
Less human contact	no emotional support	isolation, lower motivation, dropout
Bias		biased answers, unfair grades
Misinformation		errors, outdated data
Cheating & detection		AI essays; false flags
Cost	barrier for schools	
Privacy	sensitive data stored	
Teacher jobs	feared, but AI assists	

Although AI tools can support learning, several disadvantages have been identified. Both sources warn that heavy reliance on AI may reduce human contact: AI cannot replace the emotional support that teachers provide (Shonubi, 2023), and students who interact more with software than with teachers may feel isolated, lose motivation and be more likely to drop out (Walden University, 2024). The quality of AI output is a second concern, since these systems may give biased answers, assign unfair grades or spread inaccurate information (Walden University, 2024). Academic integrity is a further issue, as students can use ChatGPT to produce their work, while detection programs may wrongly flag original writing (Walden University, 2024). In addition, AI tools are costly to introduce and may store sensitive personal data (Shonubi, 2023). However, the fear that AI will replace teachers seems less justified, as it is intended to assist them (Shonubi, 2023).

BRIDGE TO ASSESSMENT 1

Sentence frames for your sustainability report

Paraphrase

- According to [Author] ([Year]), ...
- [Author] ([Year]) reports that ...
- ... ([Author], [Year]).

Summarise

- [Author] ([Year]) outlines three ...: ..., ... and ....
- In a review of ..., [Author] ([Year]) concludes that ...

Synthesise

- Both [A] ([Year]) and [B] ([Year]) highlight ...
- While [A] ([Year]) argues that ..., [B] ([Year]) suggests ...
- ... ([A], [Year]; [B], [Year]).

Quote

- [Author] ([Year]) defines ... as "..." (p. [n]).

Assessment 1 rubric, Referencing: "Error-free APA" = 91-100%. Content: "wide relevant evidence". Submitted through Turnitin.

YOU DO · INDIVIDUAL · 15 MIN

ON YOUR OWN

Your first paragraph of evidence for Assessment 1

Choose

One source on your sustainability topic that passed your credibility check, or the BBC Sustainable Living text.

Paraphrase

One paragraph (60-120 words) with three or more SWAPS levers and a citation.

Summarise

The same paragraph in one sentence.

3-check

Meaning kept? Look changed? Source cited?

Class page > Task 1.8, then "Copy my work" and paste it into the Moodle forum for this session.

EXIT TICKET · 3 MIN

Before the break

1. A cited sentence that keeps the original wording, without quotation marks: acceptable or not? Why?

2. Name the five SWAPS levers.

3. Your paraphrase scores 0% on Turnitin. Is it automatically acceptable? Give one reason.

→ **After the break:** Could your reader find it? Citations and reference lists that a marker can check line by line.
